

How do I prepare a Topic Presentation? (Students and their parents and mentors should read this!)

Selecting a Topic

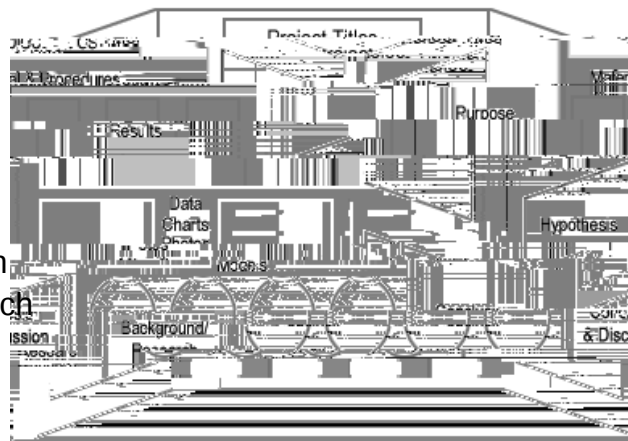

Keep it simple. What question would you like to answer? Might your family or hobbies inspire an idea?

Required Exhibit and Presentation

Your exhibit lets people see what you did.

You need:

1. a freestanding display board—it can be bought or homemade;
2. drawings, photos, charts (anything showing your project visually), citing the source for each item, including the photographer's name for each photo. If one person took EVERY photo, one label is fine.);
3. your model if you made one;
- 4.
