The Major

Environmental Studies is an interdisciplinary major that combines the natural and social sciences with the humanities. The major is designed to provide students with a broad understanding of the environment and the human impact on it. Students will study the physical, chemical, and biological aspects of the environment, as well as the social, economic, and political factors that influence environmental policy and management.

Environmental Studies is a major that is designed to provide students with a broad understanding of the environment and the human impact on it. The major is designed to provide students with a broad understanding of the environment and the human impact on it.
