

The Accounting Profession

Accounting is consistently listed among the top fields of opportunity in an increasingly challenging job market.

Our program provides excellent classroom experiences and outside-of-class opportunities that give our graduates the very best preparation for success and a valuable edge in the workplace with strong business skills from their sophomore years.

The business core includes courses in

- x accounting
- x business law
- x economics
- x finance
- x management and organizational behavior
- x marketing

During the junior and senior years, students focus more specifically on Accounting coursework.

Upper-level Accounting courses include:

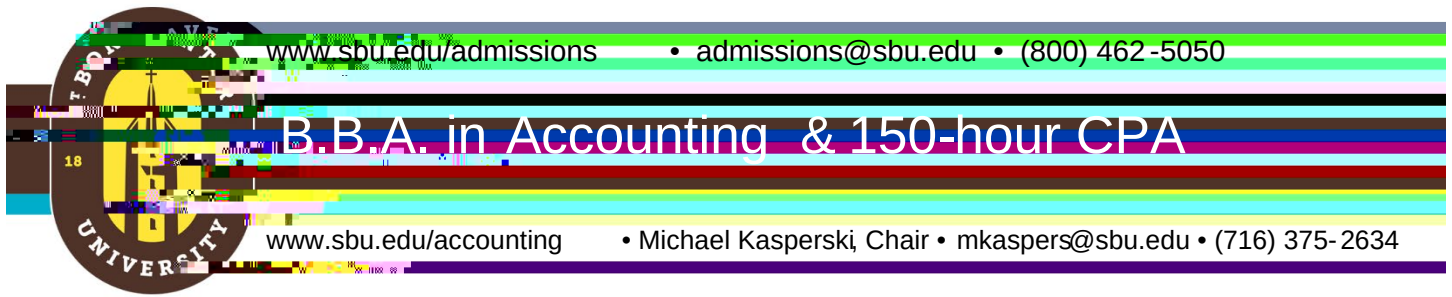

- x intermediate and advanced financial accounting
- x advanced managerial accounting
- x federal taxation and auditing

BBA and MBA

This 4+1 program (150 hours in total) is structured so that students first earn a BBA in Accounting and then an MBA in Professional Accountancy. With careful planning, both can be completed in 5 years.

Professional Accountancy Track of the MBA Program (150 hours)

Earning 150 credit hours is a common requirement to earn a CPA. The Professional Accountancy Track of the MBA prepares students for the CPA exam; our students have been very successful in this pursuit. Students apply to the Professional Accountancy Track in their junior year and begin taking MBA

But that's just part of the story.

Outside of Class
